

Tips to help you use the List of Additional Products:

- Before contacting any of the farms on the List of Additional Farm Products, please have an idea of the amount of products, kinds of products (especially for cheese providers) and frequency with which your CSA would like to order. This will save you and the farms some time.
- Each CSA should have ONE or TWO people to take all orders from the CSA members and then contact the farmer with the total. Please do not let every CSA member call and email your farmers! This can be a task for one of the core members.
- Please include with your order a phone number for farmers to contact you in case of late changes in product availability or inclement weather.
- Be sure there is at least ONE person at distribution to help unload the products and oversee the pick up of your additional products.
- When contacting dairy providers please keep in mind that your CSA may need access to a refrigerator or large cooler. There must be some system for keeping dairy products cool.
- If you are unsure of how to set up the logistics of ordering and delivery, please contact Just Food for suggestions on how to set up these systems.
- *Please* keep Just Food informed on which farmers you have contacted and who you are purchasing from. We would also love to know about any innovative ways that you are working with additional product farmers!
